Current affiliation:

Scientist 'C'

National Centre for Polar & Ocean Research, Ministry of Earth Sciences,
Govt. of India, Goa.

Education

PhD (Geo Sciences): 2010-2016

Centre for Glaciology, Wadia Institute of Himalayan
Geology (WIHG) MoU with University of Petroleum and
Energy Studies (UPES), Dehradun, India.

**Post-Master Diploma (Natural Resource
management):** 2008-2009

Forest Research Institute, Dehradun, India.

MSc (Physics): 2005-2007

Barkatullah University, Bhopal.

Research Experience

2020-present: **Scientist 'C'**

National Centre for Polar and Ocean Research
(NCPOR), Goa

2018-2020: **Project Scientist 'C'** (NCPOR).

2016-2018: **Project Scientist 'B'** (NCPOR).

2012-2016: **Senior Research Fellow**,
Centre for Glaciology, WIHG, Dehradun.

2009-2012: **Junior Research Fellow**,
Centre for Glaciology, WIHG, Dehradun.

Key Skills

Instrumentation

- Himalaya
 - Trimble GNSS
 - Ice Penetrating Radar
 - Ice Corer and Steam Drill
 - Water Level Recorder
 - Automatic weather station
- Antarctica
 - Ice penetrating radar (GSSI SIR-30, SIR-4000, Pulse Ekko, ApRES)
 - GNSS survey (Kinematic and Static)

Data Processing software

- OpendText
- MATLAB
- QGIS
- Origin
- MS office

Scientific Expeditions

2021 – 2022: Member of XLI Indian Scientific Expedition to Antarctica (Indian side field leader -SIWHA project)

2018 – 2019: Member of XXXVIII Indian Scientific Expedition to Antarctica (leader- MADICE project).

2017 – 2018: Member of XXXVII Indian Scientific Expedition to Antarctica (team member-MADICE project).

2016 – 2017: Member of XXXVI Indian Scientific Expedition to Antarctica (team member-MADICE project).

2010 – 2019: More than 20 Scientific Expeditions to the Glaciers of the western, central and Nepal Himalaya.

Scientific Journal Reviews

Annals of Glaciology, Journal of Glaciology, Arctic Antarctic and Alpine Research, Progress in Physical Geography, Geocarto International, IEEE JSTARS, Environmental Processes, The Cryosphere, ESSD, Cold Regions Science and Technology, Current Science, JESS, Scientific report, Frontiers in earth sciences.

Research Interest

Himalaya:

- Glaciological mass balance observations and modeling of Indian Himalayan glaciers to understand the impact of climate variation over last few decades.
- Analysis of air temperature, lapse rate and glacier surface melting, and the factors affecting the ablation process.
- Study of glacier's morpho-dynamics characteristics and ice volume estimation.
- Statistical modeling for equilibrium and disequilibrium state of Himalayan glaciers and the response of debris-covered glaciers in the current climatic condition.

Antarctica

- OpendText and MatLab based 1D and 3D evolution of subsurface stratigraphy of ice rises and ice shelf to estimate surface mass balance contribution of the coastal region of the Antarctica.
- Processing and analysis of ground penetrating radar (GPR), Differential GPS recording and interpretation to create digital elevation model (DEM) and for intimate connections of accumulation rate, and factors responsible for its spatial variation.
- Geographical Information (QGIS) analysis and application for elevation changes, slope, crevasse and feature identification.

Field Survey skills

Ice radar operation (GSSI SIR-30, SIR-4000, Pulse Ekko, ApRES), surveying with DGPS, phase sensitive radar deployment and analysis of ice thickness and basal melting, meteorological station (AWS) set-up, geo-morphological mapping, sampling techniques for snow/ice density measurement, stake networking for glaciers mass balance and real time crevasse radar operation with field safety training, and operation of vehicles (e.g. Skidoo, Piston bully, 4X4 vehicle etc).
