

National Centre for Antarctic & Ocean Research, Goa

Minutes of Meeting

Evaluation of Technical Bids

Dated: 8 August 2017

A duly-constituted Committee for the evaluation of Technical Bids received against tender NCAOR/LH(20)/2017 convened in the Conference Room of NCAOR on 8 August 2017.

Two bids from following companies were received and opened by the duly-constituted Standard Tender Opening Committee of NCAOR on 24 July 2017:

- (i) M/s TechBean Systems Pvt. Ltd., Pune
- (ii) M/s See-Tech Solutions Pvt. Ltd., Nagpur

The Technical Evaluation Committee went through the Technical Bids in detail and following are the observations:

- (i) M/s TechBean Systems Pvt. Ltd., Pune

M/s TechBean Systems Pvt. Ltd., Pune fulfills the tender eligibility criteria in terms of experience, average annual turn-over, completed projects and in-house expertise of engineers in relevant field. They have relevant experience in providing maintenance and repairs support/services in a number of small installations and a major contract with M/s National Centre for Antarctic & Ocean Research, Goa for onsite operation and maintenance of Bharati station.

- (ii) M/s See-Tech Solutions Pvt. Ltd., Nagpur

M/s See-Tech Solutions Pvt. Ltd., Nagpur do not fulfill the tender eligibility criteria in terms of relevant experience, completed projects and in-house expertise of engineers in relevant field. However, they meet the criteria for average annual turn-over.

After deliberations, the Committee opined that out the two bids received, the bid from M/s TechBean Systems Pvt. Ltd., Pune is technically responsive.

In view of the single responsive tender, the Committee recommends retendering of the "Onsite Operation, Non-Comprehensive Maintenance and Repairs Contract for Bharati - Indian Research Station at Larsemann Hills, Antarctica" giving a short time of 21 days for submission of tender, return of EMDs and un-opened price bids to respective companies.
